L30G in detail

Engine

Volvo 4-cylinder, common rail, diesel engine compliant to EU Stage V environmental regulations.

Maximum engine incline is 30 degrees in all directions.

Air cleaning:

1. Paper filter with indicator in cab
2. Safety filter

Exhaust after treatment system:

Cooled Exhaust Gas Recirculation (EGR), diesel oxidation catalyst (DOC) and diesel particulate filter (DPF).

Electrical System

Contronic electrical system with central warning light and buzzer, providing clear and easy to read information to the operator.

A keypad allows easy navigation on the central LCD display with main and sub information field.

Indicators and activation lights are available for various control and monitoring functions.

An audible warning alarm will sound and a central warning indicator will flash if abnormal operating values or error messages arise.

Gauges are available for coolant temperature and fuel level.

A fuse test port is available in the fuse box, allowing operators to perform initial investigations, reducing diagnostic time.

Drivetrain

The hydrostatic transmission allows for speed range change without any tractive power interruption.

Maximum tractive power is available in all speed ranges, regardless of the driving direction.

Single "Inch/brake pedal" for variable machine speed control and easy power transfer to the wheels at constant engine rpm.

Transmissions forward, neutral, reverse and differential locks buttons are all easy to reach on the multifunctional right joystick. This allows excellent ergonomics and greater efficiency in all applications thanks to the single-handed operation of the machine.

Two rigid portal axles provides long durability and best in class ground clearance.

The central articulating-oscillating joint and all wheel drive allows excellent mobility in all ground conditions.

The 100% differential lock on both axles enable low tire wear on hard ground while maximizing traction force in soft terrain.

Linkage

Z-bar linkage providing high breakout force to the bucket and also parallel movement to the fork frame thanks to Volvo's specific kinematics.

Linkage system	Z-bar	
Lift cylinders	2	
Tilt cylinders	1	
Lift time (loaded)	s	6.5
Lowering time (empty)	s	3.5
Dump time	s	1.5

Brake system

Service brake: an Inching-brake pedal provides hydrostatic wearless braking in the first stage for precise approach; if applied further the central disk brake takes over for final braking and machine immobilization.

Parking brake: Mechanically activated central drum brake, located on the rear axle dropbox and acting upon all four wheels.

Steering System

Central articulating-oscillating joint with Elastic end-stops.

Hydrostatic steering powered via a dedicated gear pump allowing precise operation even at low engine revolutions: steering the machine does not influence the working hydraulic speed e.g. when lifting loads.

Steering cylinders	1	
Working pressure	MPa	19
Maximum flow	l/min	33.5
Max articulation	± °	40

Cab

The cab is tested and approved according to ROPS (ISO 3471, SAE J1040) and FOPS (ISO 3449).

The cab is compliant with ISO 6055 requirements regarding Operator overhead protection - Industrial trucks and SAE J386 regarding Operator Restraint System.

The operator's seat features an adjustable suspension and a retractable seatbelt.

Fresh air is filtered through a large elements prior entering, ensuring extremely clean air distribution in the cab.

Several air vents enables fast de-misting and defrosting.

The contronic monitoring system provides all important information in a central position and all machine controls are located in the operator's field of vision.

Sound Level

Sound pressure level in cab according to ISO 6396:

L _{pA}	dB	75
-----------------	----	----

External sound level according to ISO 6395 and EU Noise Directive 2000/14/EC:

L _{WA}	dB	101
-----------------	----	-----

Service Refill

Ground level access, fuel filler and hydraulic oil filler well protected under the rear engine hood.

Fuel tank	l	84
Engine oil	l	11.2
Engine coolant	l	11
Hydraulic tank	l	54
Front axle oil	l	12.2
Rear axle oil	l	13.5

Hydraulic system

Working hydraulic system with pilot operated control valves.

System supply: A gear pump provides flow to the working hydraulic.

System control: Double-acting 3-spools main control valve.

The lift function has four positions: lift, hold (neutral), lower and float position.

The tilt function has three positions: rollback, hold (neutral) and dump.

The third hydraulic function has three positions: unlock attachment, neutral and lock attachment. It can power a hydraulic attachment such as sweeper, 4-in-1 bucket. A fourth hydraulic functions is available as options to power hydraulic implements (Hi-Tip bucket, angle sweeper etc...)

Filtration:

Full-flow filtration through 10 micron (absolute) filter cartridge in a combined suction-return-filter.

Cooling:

Thermostatically controlled oil flow to oil cooler (fast warm-up, optimized cooling).

Working pressure max	MPa	23
Flow	l/min	57
at engine speed	r/min	2 600
